```
Scenario: Classification of the audio sample as Buzina # alertme.feature:7
    Given I have a audio file sample "buzina.wav"          # AlertmeStepDefinition.I_have_a_audio_file_sample_audioName(S
    When the application extract the features              # AlertmeStepDefinition.the_application_extract_the_features()
    And the classification function is called             # AlertmeStepDefinition.the_classification_function_is_called(
    Then I should see the classification as "Sirene"      # AlertmeStepDefinition.I_should_see_the_classification_as_au
(String)
      java.lang.AssertionError:
      Expected: a string containing "Sirene"
           but: was "    CLASSIFICATION: Buzina"
